

Required Information

- URL: The endpoint the webhook will post to.
- Bearer Token: If your endpoint requires a bearer token for authentication, include it here. (Supports basic or bearer auth.)
- Secret: Optionally, you can provide a secret key that will be included in each request for additional verification.

Note: You can specify different endpoints per event, but we recommend sending all events to a single endpoint and handling sorting/filtering your side.

Event: HardwareConnected (SMART 2.0 app only)

Fired when a device is connected to SMART.

```
{
  "type": "HardwareConnected",
  "hardware": {
    "serial_number": "5CG116ABC",
    "firmware_number": "0CD69CE1-8390-4083-8633-9F3898AAAAAA",
    "smart_reference": "c24a0c6c-8f83-485a-9bca-2e3f6aabbccdd",
    "specification": {
      "manufacturer": "Dell",
      "model": "Latitude XYZ",
      "primary_disk_capacity": "500gb",
      "processor_model": "i7-7700k",
      "total_memory": "32gb"
    }
  }
}
```

Event: ProductKeyInjected

Fired when a product key is injected into a device.

```
{
  "type": "ProductKeyInjected",
  "hardware": {
    "serial_number": "5CG116ABC",
    "firmware_number": "0CD69CE1-8390-4083-8633-9F3898AAAAAA",
    "smart_reference": "c24a0c6c-8f83-485a-9bca-2e3f6aabbccdd"
  },
  "product_key": {
    "key": "DDDDD-EEEE-CCCC-BBBB-AAAA",
    "type": "Windows 11 Pro"
  }
}
```

Event: ProductKeyStatusChanged

Fired when a product key status changes (e.g., injected, activation-enabled).

```
{
  "type": "ProductKeyStatusChanged",
  "hardware": {
    "serial_number": "5CG116ABC",
    "firmware_number": "0CD69CE1-8390-4083-8633-9F3898AAAAAA",
    "smart_reference": "c24a0c6c-8f83-485a-9bca-2e3f6aabbccdd"
  },
  "product_key": {
    "key": "DDDDD-EEEE-CCCC-BBBB-AAAA",
    "type": "Windows 11 Pro",
    "status": "activation-enabled"
  }
}
```
